

## REMARKS

Claims 1-2, 4, 7-9, 11, 14-18, and 20 again stand rejected under 35 U.S.C. 103(a) as being unpatentable over Veerasamy et al. (U.S. 5,858,477) (“Veerasamy I”) in view of Veerasamy (U.S. 6,303,225) (“Veerasamy II”) and Takahashi et al. (JP 10-143836). Applicants respectfully traverse this rejection because Veerasamy II is not prior art against the present Application.

Veerasamy II lists, on the face of the patent, a filing date of May 24, 2000, and no other domestic priority. The present Application, on the other hand, claims foreign priority to previous Japanese Patent Application No. 2000-137571, filed May 10, 2000, in Japan. The present Application therefore has its earliest priority date two weeks clearly than the filing date of Veerasamy II, and therefore Veerasamy II is not prior art against this Application.

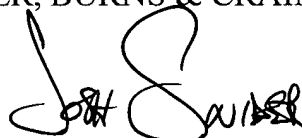

In order to gain the full benefit of the earlier Japanese Patent Application, Applicants submit herewith a full English language translation of the Japanese Patent Application No. 2000-137571, together with a sworn Declaration of the translator, Keizo Komoriya, in order to perfect priority. Priority being now perfected in this case, Veerasamy II cannot be considered prior art against the present Application, and therefore the outstanding Section 103 rejection based in part on Veerasamy II must be withdrawn.

For all of the foregoing reasons, Applicants submit that this Application, including claims 1-2, 4, 7-9, 11, 14-18, and 20, is in condition for allowance, which is respectfully requested. The Examiner is invited to contact the undersigned attorney if an interview would expedite prosecution.

Respectfully submitted,

GREER, BURNS & CRAIN, LTD.
